

Associates Commission Calculation

Name: _____

Time Period: _____

A. Associates Production: _____

B. Associates Commission Rate: _____%

C. _____

D. Less Associates Wages:
(Wages already paid in this period) (_____)

E. Associates Commission Due: _____

This is a basic Associates commission worksheet.

It is figured by multiplying the Associates Production (line A) by the Associates Commission Rate (line B) to get line C.

Subtract the Associates Wage (line D) from line C to arrive at the Associates Commission due (line E).
